

LINN

Radio DS: Internet radio at the touch of a button

Experience the best sounding internet radio with LINN DS

Radio DS provides access to thousands of internet radio stations streamed through Linn's high performance DS players. It's the fuss free way to discover the latest music being played on your favourite radio stations at the best quality possible.

Easy set-up

- New installations are even quicker and easier with no need to rip CDs or connect to a drive for music content

Instant access to music

- Music is available on set-up with pre-programmed global and regional presets

No PC required

- Only your internet connection needs to be active, you don't need to turn on your computer to control DS Radio - just use your Linn remote

Control through Kinsky and Linn remote

- Use the Kinsky Desktop, PDA or Pronto control applications to choose your stations - third party controls will follow

Demonstrate the highest quality internet radio with [Linn Radio](#)

- Linn's new radio stations - Linn Radio, Linn Jazz and Linn Classical - stream at 320kbps mp3 (better than DAB) to let you experience the highest quality internet radio available

Use Radiotime.com to customise presets

- [Radiotime](#) gives access to thousands of stations and podcasts worldwide to create personal presets

'The biggest free upgrade ever' said one Linn forum member on the beta release.

Additional Cara 6 features

- KinskyPDA is now available giving DS owners another control option
- Lip Sync for the Majik DS-I and Sekrit DS-I
- IR for the Sekrit DS-I
- Digital volume control for Klimax DS and Akurate DS

Trade opportunities

- Upgrade your DS with Konfig to demonstrate the best sounding internet radio with Linn's own stations
- Contact all DS owners and upgrade them to the latest software to experience the Radio DS feature
- Contact all PDA owners to upgrade them to the latest software
